Location: Bengaluru, India

### WORK EXPERIENCE & INTERNSHIPS

#### FlyRank AI – Front-End AI Engineering Intern

June 2026 – Present | 12 Weeks Internship | Bengaluru, India

- Selected out of 200+ applicants for engineering internship; built 15+ responsive React web interfaces, boosting engagement by 35%.
- Architected 5+ AI-driven feature workflows, optimizing API response handling and reducing UI rendering latency by 40%.
- Refactored legacy CSS/JS modules into reusable component libraries, accelerating frontend feature deployment velocity by 25%.

#### DSCE ERP System – Lead Developer

Academic Year 2025 – 2026 | DSCE Bengaluru

- Architected full-stack mini-project platform for 500+ engineering students and 30+ faculty using React, FastAPI, and Firestore.
- Designed automated guide allocation algorithm, eliminating 100% of manual scheduling conflicts and saving 40+ hours/semester.
- Implemented rate-limiting middleware and RBAC protocols, achieving 99.9% system uptime and zero security breaches.

### KEY PROJECTS & ACHIEVEMENTS

#### National Agriculture Tech Solution – Team Lead

Jan 2026 | IBM & ACM Co-sponsored National Hackathon

- Led 4-developer team (Alpha\_Coders) to build an automated IoT/AI agricultural monitoring platform during a 36-hour hackathon.
- Ranked in **Top 37 National Finalists (Top 1.5%)** out of 2,500+ competing developer teams across India.
- Developed telemetry dashboards rendering real-time crop sensor data points for 100+ simulated fields.

#### Open Source & Web Applications – Developer

2024 – Present | GitHub Profile

- Authored 10+ public GitHub repositories with 100+ commits, 95%+ documentation coverage, and web tools.
- Optimized bundle sizes and critical rendering paths, improving Google Lighthouse scores from 72 to 98/100.

### EDUCATION

#### Dayananda Sagar College of Engineering (DSCE)

B.E. in Information Science & Engineering (ISE) (2024 – Present)

Coursework: Data Structures, DBMS, Web Engineering, OOP (C++/Java), OS.

### PROFESSIONAL SUMMARY

High-performing Software Engineer and Front-End AI Engineering Intern proficient in JavaScript (ES6+), React, C/C++, and Python. Demonstrated success in engineering web platforms for 500+ users, reducing project overhead by 80%, and ranking in the Top 37 National Finalists out of 2,500+ teams. Passionate about user-centric UIs.

### TECHNICAL SKILLS

#### Core Languages

JavaScript (ES6+), C, C++, Python, HTML5, CSS3, SQL

#### Frontend & Web

React.js, Vite, Web APIs, CSS Grid/Flexbox, Responsive Design, State Mgmt

#### Backend & Databases

Node.js, FastAPI, REST APIs, Firestore NoSQL, MongoDB, Python Systems

#### Tools & Workflows

Git, GitHub, VS Code, Linux Shell, RBAC Auth, Rate-Limiting, CI/CD

### CERTIFICATIONS & HONORS

- Top 37 National Finalist (Top 1.5%):** Tech For Agriculture National Hackathon co-sponsored by IBM & ACM (Jan 2026)
- Mastering C & C++ Programming:** Certified by Udemy (Jan 2025)
