PROFESSIONAL SUMMARY

Innovative and proactive Information Science & Engineering student at Dayananda Sagar College of Engineering. Experienced in full-stack development, AI-powered developer utilities, backend database engineering, and secure REST APIs. Active open-source contributor and national-level hackathon finalist with a strong focus on clean architecture, security middlewares, and automation.

EDUCATION

Dayananda Sagar College of Engineering (DSCE) Bangalore, India
Bachelor of Engineering (B.E.) in Information Science & Engineering 2024 – Present

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, C, C++, HTML5, CSS3
- **Frameworks & Libraries:** React 19, FastAPI, Node.js, Express, Flutter
- **Platforms & Tools:** Firebase (Firestore, Auth), MongoDB, SQL/DBMS, Git & GitHub, Docker, VS Code, Vercel

PROJECTS

Code Rakshak — AI-Powered Security Scanner | Lead Developer

Stack: React, Node.js, AI APIs, PDFKit, JavaScript

- Developed an AI code analyzer scanning repositories for security vulnerabilities, loops, and quality issues.
- Implemented security scoring matrices (Strength and Fairness) and generated dynamic, downloadable PDF reports.

DSCE ERP Mini-Project Management System | Lead Developer

Stack: React 19, FastAPI (Python), Cloud Firestore, Firebase Auth

- Architected a unified digital dashboard with specialized role-based portals for Students, Guides, and Admins.
- Engineered sliding-window API rate limiters and brute-force IP locking middleware to prevent security threats.
- Developed load-balanced algorithms assigning project groups to guides based on branch capacity limits.

Namma Raitha — Smart Agriculture Platform | Lead Developer

Stack: Python AI, Flutter, Firebase Firestore, IoT Soil Sensors

- Designed a bilingual (English/Kannada) Agri-Tech app offering AI-based pest guidance and growth analytics.
- Integrated physical IoT sensors with web dashboards to monitor real-time soil metrics for farmers.

Hostel Management System | Developer

Stack: JavaScript, Node.js, Express, SQL/DBMS, Bootstrap

- Built a database-driven web application to automate room allocations, mess charges, and student registration.

- Engineered relational schemas for fee collections, student logs, and grievance portals to reduce manual paper work.

Interactive Developer Portfolio & Open Source Contributions | *Contributor*

Stack: [HTML5](#), [CSS3](#), [JavaScript](#), [Git/GitHub Workflows](#)

- Developed an animated glassmorphism landing page with asynchronous GitHub API repositories sync.
- Successfully merged profiles and code templates to the global first-contributions and code-contributions codebases.

ACHIEVEMENTS & CERTIFICATIONS

- **National Hackathon Finalist (Top 37)** – IBM / ACM & Jain University Tech for Agriculture Hackathon (Jan 2026)
- **Mastering C & C++ Programming: From Fundamentals to Advanced** – Udemy (January 2025)
- **Responsive Web Design Certification** – freeCodeCamp (2026)
- **Active Git & GitHub Contributor** – Regularly contributing to global open-source codebases with verified badges.
